

CALL FOR SUBMISSIONS

NEW DEVELOPMENTS IN AI FOR SOCIAL, ECONOMIC, AND POLICY RESEARCH CONFERENCE

Friday, 29 January 2027
Lee C. Bollinger Forum, Columbia University New York City

AI AND THE FUTURE OF WORK

OVERVIEW

Artificial intelligence is reshaping how work is organized, performed, valued, and governed. These changes extend beyond the adoption of new tools: they may alter the division of labor between people and machines, transform occupations and professional identities, reorganize workplaces and labor market practices, and create new opportunities and inequalities. The conference will examine the future arrangements of work in this broad sense.

This conference will bring together academic researchers, industry leaders and practitioners, and policymakers. We welcome perspectives from sociology, economics, political science, public policy, management, labor studies, computer science, and related fields, as well as experience from organizations developing, implementing, regulating, or responding to AI at work.

SUBMISSION DETAILS

- **Submission format:** Extended Abstract (about 1,000 words)
- **Submission deadline:** November 30, 2026, Monday, EST 11:59 PM
- **Notification of acceptance:** December 7, 2026, Monday
- **Registration deadline:** January 4, 2027
- **Submission link:** https://forms.gle/qiLsrHD5zUQ491tF8

Accepted papers will be presented during either a paper session or a dedicated poster session, providing opportunities for discussion, feedback, and networking among academic researchers, industry practitioners, policymakers, and others working on AI and the future of work.

For additional information about the conference and submission guidelines, please visit the conference website.
